

Additional EMD RFI Questions

- A. (posted 10/03/01) - The government is considering moving the ECS PVC/VATC/EDF environments to a facility located at the GSFC, in lieu of requesting the EMD contractor to provide a similar facility. We are also exploring the feasibility of leasing space off-site, but in the nearby vicinity of GSFC to house the EDF/PVC/VATC. The government is interested in understanding the pro's and con's of these alternatives, as seen by potential bidders. Please provide a list of pro's and con's from your viewpoint.

- B. (posted 10/03/01) – The government is interested in your opinion concerning the pro's and con's of requesting oral technical proposals in lieu of a written technical proposal.
